

Fosroc Barrel Gun

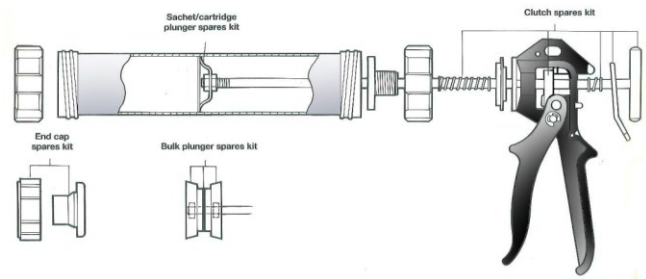

Sealant Barrel Gun 600 ml.

Description

A light weight, powder coated aluminium barrel gun specifically designed for use with Fosroc 600 ml sachets and adaptable for use with cartridges and application of multipart sealants

Advantages

- Easy to Use
- Reusable

For bulk application: of multi component sealants, the gun can be modified by fitting a full bore plastic bulk plunger head. To adapt, remove the sachet plunger head and domed steel plunger and replace with the full bore plastic plunger.

Remove the end cap, insert the nozzle holder and fit one of the three nozzles supplied, to suit requirements. The gun may be filled directly from the tin of mixed sealant using the Fosroc Follower plate

For cartridge application: the cartridge plunger head and the front cap nozzle holder must be removed to enable the gun to be used with 310 ml, 400 ml or 600 ml plastic cartridges

Undo the plunger retaining nut and remove the plastic plunger leaving a smaller diameter domed steel plunger behind it in place. Replace the retaining nut and adjust and tighten, to ensure that the retaining nut and tee of the clutch rod does not project beyond the front of the plunger. Press in the centre of the barrel end cap to remove the plastic nozzle holder centre piece which is not required. Depress the release plate, pull back the plunger rod, insert the prepared cartridge and replace the end cap.

Cleaning

Clean the barrel gun immediately after use with Fosroc Solvent 102.

For more information contact your local Fosroc representative.

Application instructions

For sachet application: the gun is fitted with a special sachet plunger head to provide smooth positive action

To load, remove end cap, press one of the special nozzels supplied with the carton of sachets into the cap.

Depress the release plate, pull back the plunger rod, insert the sealant sachet, cut a slit in the top of the sachet and replace the end cap.
