

# Fosroc Nitotile XS Grout

## Polymer modified, cementitious grout

### Uses

As a grout for tile joints in:

- Kitchens
- Bathrooms
- Shower stalls
- Swimming pools

### Advantages

- Low cost service life-mould resistant, tropical grade suits Middle East working conditions
- Easy to apply - thixotropic, non-slump grout
- Water resistant - can be used in submerged conditions
- Available in a range of attractive colours

### Description

Nitotile XS Grout is supplied as a one component pack, which requires only the on-site addition of clean water. It readily blends to produce a smooth creamy paste which, when set, is water and mould resistant. Nitotile XS Grout is used in conjunction with Nitotile tile adhesives.

### Standard Compliance

Complies with the European standard EN13888, of tile grouts.

### Properties

<b>Density</b>	:	1600kg/m <sup>3</sup>
<b>Flexural strength (EN 12808-3)</b>		
28 d sc	:	>6 N/mm <sup>2</sup>
<b>Compressive strength (EN 12808-3)</b>		
28 d sc	:	>22 N/mm <sup>2</sup>
<b>Shrinkage after 28 d sc</b>	:	< 2 mm/m
<b>Water absorption (EN 12805-5)</b>		
30mins	:	< 3g
240 mins	:	< 5g
<b>Resistance to Fungi/Mould (ASTM G21)</b>	:	Resists growth of Fungi/ Mould

### Instructions for use

#### Preparation

All tiles must be securely fixed in place and thoroughly cleaned before Nitotile XS Grout is applied. The gap between tiles should not exceed 6 mm.

#### Mixing

A slow speed drill fitted with Fosroc Mixing Paddle MR4 and a mixing vessel of minimum 20 litre capacity are recommended.

Measure out 6 litres of clean water into the mixing vessel, add the powder component to the mix and continue mixing for 2 to 3 minutes until a uniform, lump-free consistency is achieved. Allow to stand for 10 minutes prior to use.

#### Application

Apply Nitotile XS Grout to the spaces between the tiles using a sponge or a small piece of soft cloth. Work the mixture into the joints and around the edges.

Remove surplus material from the face of the tiles with a dry cloth and run the tip of a gloved finger or suitable rounded tool along the grout to level it off and form a profile.

When the grout is dry, clean the tiles with a damp sponge to remove any excess material. It is advisable to remove uncured grout from textured tiles prior to setting, failure to do so may result in difficulty in removal.

# Fosroc Nitotile XS Grout

## Cleaning

Nitotile XS Grout should be removed from tools, equipment and mixers with clean water immediately after use. Cured material can only be removed mechanically.

## Limitations

Nitotile XS Grout should not be used when the temperature is below 5°C and falling. The product should not be exposed to moving water during application. If any doubts arise concerning temperature or substrate conditions, consult your local Fosroc office.

## Estimating

### Supply

**Nitotile XS Grout powder** : 20 kg bags

### Yield

**Nitotile XS Grout** : 16 ltrs per bag

## Storage

### Shelf life

Nitotile XS Grout has a shelf life of 12 months if kept in a dry store in the original, unopened bags or packs.

### Storage conditions

Store in dry conditions in the original, unopened bags or packs. If stored at high temperature and / or high humidity conditions the shelf life may be reduced to 4 to 6 months.

## Technical support

Fosroc offers a comprehensive range of high performance, high quality repair, maintenance and construction products. In addition, Fosroc offers a technical support package to specifiers, end-users and contractors, as well as on-site technical assistance in locations all over the world.

## Precautions

### Health and safety

Nitotile XS Grout is cement based. Care should be taken to avoid inhalation of dust and contact with eyes. All cement based products, when mixed or damp release alkalis which can be harmful to the skin.

## Additional Information

Nitotile XS Grout is part of a range of Fosroc tile adhesives and tile grouts.

Fosroc manufactures a wide range of complementary products which include:

- Waterproofing membranes & waterstops
- Joint sealants & filler boards
- Cementitious & epoxy grouts
- Specialised flooring materials

Fosroc additionally offers a comprehensive package of products specifically designed for the repair and refurbishment of damaged concrete. Fosroc's 'Systematic Approach' to concrete repair features the following:

- Hand-placed repair mortars
- Spray grade repair mortars
- Fluid micro-concretes
- Chemically resistant epoxy mortars
- Anti-carbonation/anti-chloride protective coatings
- Chemical and abrasion resistant coatings

For further information on any of the above, please consult your local Fosroc office - as below.
